FILMOP, AN ITALIAN WORLDWIDE LEADING

www.filmopusa.com

Filmop's mission is to satisfy all needs in professional cleaning through the design and manufacture of the best cleaning systems without forgetting the health and wellbeing of people and the full respect of the environment when introducing new projects.

Filmop was founded in the early 70s.

Situated in Northeast Italy, Filmop is a leading company in professional cleaning and a reliable partner for thousands of people who operate in this market and we are proud to develop the "**Made in Italy**" trademark all over the world.

COMPANY IN PROFESSIONAL CLEANING

Your trusted partner

Filmop is a "trusted partner" completely oriented towards customer's satisfaction.

Certifications

In 40 years of activity, Filmop has developed technical, social and organizational skills which have allowed it to reach high quality standards, both from a company and a product standpoint.

Filmop's commitment toward environment preservation and sustainable development

Filmop's contribution towards sustainable development finds fulfilment in its commitment to:

- **value each person as a human being:** the company has a modern and avantgarde structure with wide offices featuring individual booths and working tools, respecting healthcare laws, bright warehouses and industrial machines in compliance with workers' safety. Moreover, Filmop is fighting against the exploitation of child labor and is proud to employ disabled people and people with long term seniority (15 – 20 years);
- **environment protection:** today, compared to the past, we have the means and the knowledge to make conscious choices for environmental preservation.

Favoring products which respect European Union laws and manufactured by certified companies can really make the difference.

A complete range of products... and many successes

Innovation, research and development are keywords that have contributed to Filmop growth; this company has always been successful thanks to its capacity to understand and anticipate the requests and needs in the market; this is what differentiates a leading company from all the other companies operating in the same field.

Since its establishment Filmop has always been investing in new technologies, thus being one of the main figures in the changing process of professional cleaning during the last 30 years. It was the first Italian company with a special attention to:

- **an alternative to metal materials**, such as polypropylene, very strong, light and completely recyclable
- **a separation between clean water and rinsing water**, fundamental issue for a professional cleaning
- **ergonomic cleaning systems** in order to make work easier and improve the conditions of the operators in the cleaning field

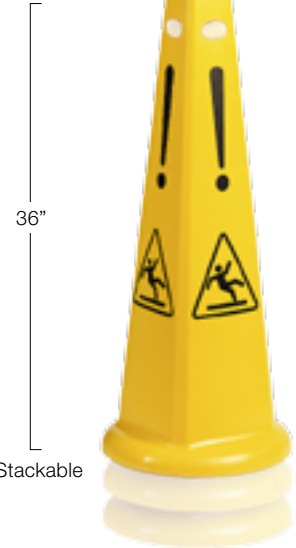

Filmop has developed a complete range of products for professional cleaning with more than 4.000 finished items.

A-B PLUS™ ANTI-BACTERIAL SYSTEM

www.filmopusa.com

Filmop A-B PLUS™ Anti-Bacterial System

Made of recyclable material

Closed cell construction to meet higher hygiene standards

Smooth surfaces for easy cleaning

No sharp corners to scratch workers or facility surfaces

Completely rust-proof

Non-marking rubber wheels for quiet operation

Full upright separate compartments

Ergonomic push-grip

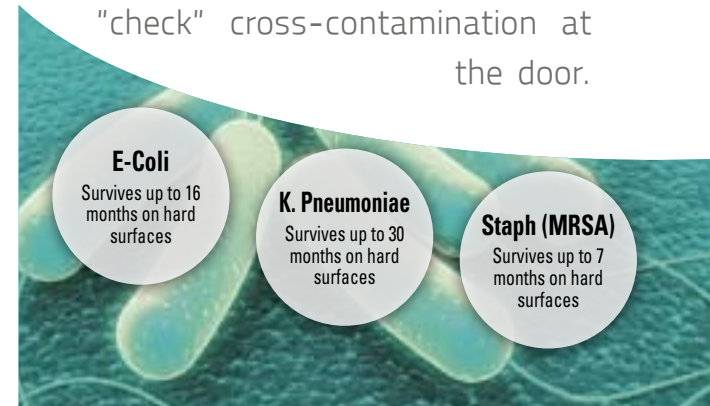

Step-pedal opens cover for no-touch disposal

Front opening door for easy waste bags removal

Soft, quiet cover closing

Wide opening drawers for easy access

Bacteria can be spread unknowingly by cleaning professionals as they come into contact with microbes on various surfaces and transfer them onto cleaning carts, maintenance equipment, and mop handles. Once deposited on these surfaces, they can remain active. Surfaces of Filmop's A-B Plus System, made with anti-bacterial properties, are protected against the growth of bacteria, mold, mildew and fungi that cause odors and stains. It's an effective way to "check" cross-contamination at the door.

E-Coli

Survives up to 16 months on hard surfaces

K. Pneumoniae

Survives up to 30 months on hard surfaces

Staph (MRSA)

Survives up to 7 months on hard surfaces
