Terms & Conditions

Terms

Credit terms are net 30 days to established accounts. No C.O.D. orders accepted. To apply for credit, please contact your representative or our customer service department.

6445 Metcalf Avenue
Overland Park, KS 66202
Phone: 816.842.0233
Fax: 816.842.1129

Ordering

Please use stock number, item names and include color selection if applicable. To order call our Customer Service Department: 800-821-2792. In the Kansas City Area, call 816-842-0233. You may fax orders to: 800-487-4079 or 816-842-1129. Orders can also be emailed to orders@goldenstar.com

Minimum Order Charge

A \$5 net minimum order charge will be added to all orders less than \$100 net. There is no processing charge if the order totals more than \$100 net.

Returned Goods Policy

Returned merchandise is subject to a 20% restocking charge.* Returned merchandise will be accepted only if accompanied by a return authorization number issued by our Customer Service Department. All returns must be shipped by prepaid freight unless otherwise authorized. Any collect shipment we receive must be handled by our approved carrier or you may be subject to a credit penalty. Merchandise must be returned to the specified manufacturing plant or warehouse.

*NOTE: Private labeled or obsolete merchandise may not be returned for credit.

Freight Policies

Freight is prepaid on \$1,800.00 orders of any product combination shipped to one location within the continental US.

Non-Preferred Carrier

Prepaid shipments requesting a non-preferred Golden Star carrier will be converted to collect charges. Golden Star will extend a freight allowance of the Golden Star preferred carrier charge for the same shipment. Golden Star will not be liable for any additional charges that may be accrued by using a Golden Star non-preferred carrier.

Add-On Orders

An add-on order must be received within 24 hours of the original order to guarantee shipment together. If an add-on must be shipped separately, the customer will be responsible for any additional freight charges.

Private Label Policy

Golden Star offers the finest private label mop program in the industry. Minimum order required for private labeling is 120 mops. Orders may include mixed products.

Broken Package Charge

A 10% charge will be added for all products ordered in less than standard packages of any one specification; e.g., color and size.

Superior Quality

For over 100 years, Golden Star Inc. has maintained a tradition of excellence and integrity, providing a broad range of products to enhance cleanliness, productivity, communication, health and safety.

By monitoring every step of the manufacturing process, we ensure the highest quality products for maximum performance. Golden Star possesses the unique ability to produce our own mop yarn. The fibers are actually blended and spun in our facilities, providing us with complete control over quality, from raw fibers to finished product.

The development of three overseas mop production plants, in conjunction with our two US facilities, enables Golden Star to concentrate all efforts on maintaining a thorough line of dust control mops and wet mops. Each of the vertically-integrated manufacturing facilities produces superior products manufactured in the most cost-efficient manner possible.

Trust Golden Star for innovative solutions to your floor care needs. Discover superior quality service, selection and performance with Golden Star.

Product Life Cycle Innovation

Golden Star understands that there is more to the value of our products than just cleaning, therefore we have dedicated ourselves to the education of our customers and the innovation of an eco-friendly product line for a greener tomorrow.

From Trash to Treasure

Polyethylene Terephthalate, or PET, is used to make high-impact resistant containers. Everyday products such as soda bottles, water bottles and many household products create PET waste. According to the Container Recycling Institute, more than 116 billion beverage containers are thrown away, littered and incinerated annually.

When we are able to take ordinary PET plastic bottles and turn them into high-grade dust control products, we make a significant impact on everyday waste. Our Scepter™ looped-end mops are made with 76% post-consumer content, of which 30% is PET plastic.

Another source of recycled material for our mops comes from recycled cotton fibers. Using fibers from clothing, linens or other fabrics, we are able to produce mops with up to 93% post-consumer recycled fibers. Our dust mops may contain up to 60% post-consumer recycled fibers.

We believe that every little bit counts, our mops contain the highest percentage of recycled content of any mop manufacturer in the business. We are consistently looking for ways to refine the manufacturing process to both reduce and reuse waste whenever possible. By utilizing a vertically integrated manufacturing system we are able to provide the most eco-friendly products while maintaining excellent performance and durability. This is our commitment to the planet, to quality and to you.

Packaging & Distribution

In today's global economy one of the most important issues is to insure we are maximizing shelf pack-out with all products we are providing. Golden Star Max-Pack™ mops allow you to maximize your shelf pack-out by up to 43% over standard boxed mops. On average a standard pallet of boxed mops will contain 502 mops. On average Max-Pack mops contain 720 mops per pallet for the same cubic foot print.

Max-Pack mops are eco-friendly: Wet mops contain up to 93% post-consumer content and dust mops contain up to 63% post-consumer content (PCC), utilizing over 3,088,800 million pounds of recycled plastics (PET) and PCC fibers per year.

Max-Pack mops allow 43% more products per truck load reducing the number of shipments needed, saving 264,000 gallons of fuel and eliminating 2,102 tons of green house gas emissions per year. As to distribution of our Max-Pack pallets and other products we work closely with our carriers to achieve full truckloads and utilize intermodal rail transportation whenever possible.

Waste management is also a very important part of protecting the environment. Max-Pack mops are packaged with recycled poly-wrap packaging materials, reducing land fill waste by 97% over corrugated packaging.

- Maximize shelf pack-out by 43% for total cube utilization.
- Maximize shipping cost with up to 43% more product per truck load.
- No more broken cases with Max-Pack mops. Max-Pack mops are standard packaged with our three level packaging system. First, each mop is individually poly-wrapped. Second, six mops are packaged together. Third, six-count packages are wrapped together.

Responsible Production

Workforce Community

Ensuring a safe work environment for all employees, here in America and with our overseas supply chain partners is a top priority. Golden Star is most proud of our partners that are Worldwide Responsible Accredited Production (WRAP) certified.

WRAP is an independent, non-profit organization dedicated to the certification of lawful, humane and ethical manufacturing throughout the world. WRAP's 12 Principles are based on generally accepted international workplace standards, local laws and workplace regulations which encompass human resources management, health and safety, environmental practices, and compliance including import/export and customs compliance and security standards. We encourage you to visit www.wrapcompliance.org for details.

Finding the Right Mop for Every Job

Golden Star mops are manufactured to the highest quality standards in the industry. They are specifically designed and manufactured to withstand the demands of tough industrial and commercial maintenance applications. A broad range of mops is available to suit every purpose and budget.

INITIAL COST VERSUS VALUE

Since labor costs represent over 90% of the cost of cleaning, it only makes sense to invest in cleaning materials that reduce labor. Spending a bit more on quality materials and supplies will often save many times the amount in labor over the product's lifetime.

HOW TO SELECT THE BEST WET MOP

The selection of a wet mop requires taking into consideration several factors: style of mop, yarn type, size, headband style, color and launderability, among others. The following information will help you determine which mop best fits your needs.

LOOPED-END VS. CUT-END

- Looped-ends (or Fantail Style) provide better performance and cost savings. They cover more space in one pass, reducing labor costs. They last longer, don't fray or lint, and provide smooth application of chemicals. These mops are ideal when a facility wants to launder their wet mops. Golden Star's Barricade® anti-microbial wet mop is the best wet mop available in the industry.

Fantail Style

- Cut-ends (or Standard Style) are popular because of their low initial cost, but are not as cost-effective in the long run. They may lint, unravel and leave floors with uneven coverage. They are effective for general mopping.

Standard Style

HEADBANDS

- Golden Star wet mops are available with 1 1/4" (3.2cm), 5" (12.7cm) and Sta-Flat™ style headbands. Screw-N-Go mops have a special screw-type head for easy changing. Barricade, Scepter™ and Synergy™ mops come standard with 9" (23cm) headbands.
- Looped-end wet mop headbands are color coded by size to make identification easy:

GOLDEN STAR STANDARDIZED HEADBAND COLOR CODE

HEADBAND COLOR	LOOPED-END WET MOP	CUT-END WET MOP
yellow	SMALL	12oz
green	MEDIUM	16 oz
white	WHITE	20oz
red	LARGE	24oz
blue	X-LARGE	32oz

HEADBAND STYLES

5" Width

Sta Flat

YARN OPTIONS

- Blended:** Golden Star's blended cotton, rayon, polyester and acrylic yarns offer the optimum performance. Cotton provides high water absorption and retention. Rayon affords maximum water pickup. Polyester supplies excellent strength and abrasion resistance. Acrylic provides the color and aids in water release.
- Cotton:** Mops made with cotton yarn are popular because of their low initial cost, limited shrinkage and great absorption. They require a break-in period to remove natural oils and are susceptible to mildew and rot if not properly maintained.

- *Nylon:* Nylon yarn is made of continuous monofilament that is non-linting and releases liquids evenly, leaving a uniform, glossy finish. It won't mold or mildew and is the preferred yarn for finish mops.
- *Rayon:* Rayon fibers have fast absorption but low retention and are commonly used for finish mops or for applying disinfectant. They are mildew resistant, do not lint and dry fast.
- *Color options:* Many Golden Star mops come in a variety of colors that are both aesthetically pleasing and useful for assigning and easily identifying job selection or usage area.

HOW TO SELECT THE BEST DUST MOP

A good dust control program, when used in conjunction with wet mopping, can reduce labor costs, prolong the finish on floors, reduce dust-related health problems and enhance the appearance of floors. Golden Star provides a broad selection of dust mops and specialty accessories designed to meet every need.

LOOPED-END VS CUT-END

- Looped-end construction helps eliminate snagging, fraying and linting. The mops will last longer and withstand laundering.
- Cut-end mops are more economical in their initial cost, but they are not designed to withstand rigorous use or repeated laundering.

YARN OPTIONS

- Golden Star's Infinity Twist® yarn provides the ultimate in durability and performance. Dust mops made with this specially-formulated yarn can withstand repeated laundering and won't fray or unravel. Infinity Twist yarn is the best dust mop yarn in the industry.
- Synergy™ yarn picks up dust by static attraction, eliminating the need for dust mop treatment. Mops can easily be rinsed out and air dry quickly.
- Disposable dust mops are made with absorbent open-twist blended yarn. They are not launderable, but can be re-treated for extended use.

RETREATING INSTRUCTIONS

Mops that require treatment will last longer and be more effective if the following procedures are followed:

- Clean away soil by brushing or vacuuming mop head.
- Apply oil-or water-based treatments, following instructions on the container.
- Roll up mop with the yarn facing inside and place in poly-bag to allow overnight wicking.

STAR RATING SYSTEM

Some of the categories of mops have several selections from which to choose. In these cases, Golden Star has identified the recommended selections with a star rating as follows:

- The preferred choice

- Highly recommended

- A good value choice

Looped-End Wet Mops

BARRICADE® WET MOP

*The Top Performing Mop in the Industry –
Excellent for Healthcare Applications*

- Barricade mops have built-in anti-microbial protection that prevents mold, mildew and odor.
- First-patented Barricade formula never washes out.
- Mops are pre-laundered and pre-shrunk.
- Date coded to prove long life.
- Looped-end construction eliminates tangling and reduces wear.
- Double tailbands provide wide surface span and even coverage.
- Highly absorbent 4-ply green, blue or orange yarn.
- Tough, polyester, double-wrapped headbands.
- Headbands are color-coordinated for at-a-glance identification.
- Can be property marked to identify department (minimum order required).
- Launderable.

Looped-End Finish Mops

REFLECTIONS™ WET MOP

Premium Finish Mop

- 100% nylon yarn releases finish evenly, leaving a smooth silky finish.
- Mops glide on the floor, resulting in less fatigue and quicker completion of tasks.
- Continuous filament yarn won't lint and stays looking whiter, longer.
- Nylon yarn helps prevent mold and mildew growth.
- Tailband provides wide surface span and even coverage.
- White tailbands and headbands won't bleed into floor finish.
- Not launderable.

WAXER WET MOP

Industry Standard Finish Mop

- 4-ply blue and white candy-striped poly-rayon synthetic blend yarn releases and spreads finish evenly.
- Tapeless tailband eliminates streaking, while looped ends eliminate tangling.
- Tailband provides wide surface span and even coverage.
- Synthetic blend yarn helps prevent mold and mildew growth.
- White headband won't bleed into floor finish.
- Not Launderable.

Concrete Mops

NEW!

Concrete is an extremely durable and versatile material, making it a popular option for many exterior and interior surfaces. However, since concrete is porous, regular cleaning is essential. Golden Star's new concrete mops help meet the needs required for cleaning and maintaining various polished concrete floors. Custom blended grade A poly/cotton yarn is designed to hold up to tough concrete surfaces. With excellent soil pickup and retention abilities our mops will go the distance to provide greatest clean.

CONCRETE DUST MOP

- Infinity Twist® yarn won't fray or unravel.
- Effective for concrete floors.
- Comes pre-laundered and ready to use.
- Strong Synthetic backing lasts through mop life.
- Date coded to monitor product life.
- Launderable.
