100% Green Power Supplied

Denotes the EchoLine by O'Dell. Industrial floor care for the environmentally conscious company.

The O'Dell Corporation

Environmental Commitment

Today, climate change is at the forefront of global issues. Companies worldwide are coordinating their efforts to improve conditions for the promise of a better tomorrow. The O'Dell Corporation will continue to play our part through environmentally sound practices in our manufacturing facility and responsible, sustainable product design.

In 1995, O'Dell established a 1,000 acre tree farm and wildlife habitat on company land, beginning the first of many green initiatives. With the support of the South Carolina Waterfowl Association, wetlands were created within the tree farm, which shelter local and migratory waterfowl. O'Dell has created many hiking trails and campsites within this habitat, which are used to nurture youth awareness of our environmental responsibilities.

The O'Dell Corporation is 100% green power supplied, and is the first manufacturer in South Carolina to make this commitment. We are proud to be a member of the EPA's Green Power Partnership. O'Dell uses bio-compostable, corn-based PLA film in our packaging process. We practice a plant-wide recycling program, for corrugated cardboard, textiles, plastics and office paper. O'Dell plans to make full use of new, sustainable technologies as they arise.

History

O'Dell Mop and Broom Company, founded in 1945 by returning veteran William O'Dell Sr., began with one broom making machine, one deck mop winder, and one wood-paneled station wagon for deliveries. William O'Dell made a commitment to produce the highest quality cleaning products and give his customers the best service possible. That commitment to service still stands after more than sixty years.

Since 1945, The O'Dell Corporation has grown at a steady pace. We are now one of the leaders in the cleaning products industry. The philosophy at O'Dell is to produce the highest quality cleaning tools available, at a fair cost to the distributor. We believe that quality, prompt service, and cost are factors upon which our customers depend. We provide custom manufacturing, custom packaging, and private labeling along with our outstanding personalized customer service.

O'Dell vigorously seeks out quality improvements for existing lines – combining customer feedback with experience to foster a climate rich with new product development and innovation. Our zeal for product innovation is tempered by the deep-felt desire to be good corporate citizens, which is why environmental impact is considered foremost as both our company and product lines expand.

Wet Mops

Choosing the proper model

Make the right choice of mop based on your specific job requirement.

Headband

Widebands – may be laundered many times, and used with all handle styles. Standard widebands are made of 5" vinyl coated nylon mesh, for strength and to facilitate speedy drying.

Narrowbands – constructed of 1 1/4" polyester tape, they are usually placed on the economical, cut end mop-heads. Woven poly headbands are also available in 7, 8, and 9" widths.

Yarn

Choose Cotton, Rayon, Synthetic, Blended yarn, Microfiber and Microfiber/Synthetic blends, depending on the application (see below).

Tailband

Tailbands prevent tangling, and extend a mop's functional life. They provide wider floor coverage per pass and less streaking, which equals faster mopping and reduced labor.

Ends

Looped Ends are more durable and launderable.

Cut End mops are lower cost, disposable.

	Blended*	Cotton	Rayon	Knitted Woven Cotton	Microfiber	Hybrid**	Finish
Industry Applications	General Maintenance & Healthcare	Industrial, Institutional, & Commercial	Industrial, Institutional, & Commercial	Restaurant & Clean Room	Healthcare	General Maintenance	Liquid Applications
Uses	General cleaning and disinfecting, Application of chemicals.	Quick spill pick-up, General cleaning	General cleaning and disinfecting, Application of chemicals.	Great for mopping anti-skid floors	Healthcare color coding to prevent cross contamination, Floor finish application	Healthcare, quick spill pick-up, commercial laundries	Finishing - Great for dispensing chemicals and waxes.
Pros	Highly absorbent, Limited break-in required, Great for laundering, Yarn color choices, Fiber picks up 6-7 times its weight, Durable staple fibers	Highly absorbent, Economical, Good liquid retention	Highly absorbent, Little break-in required, Good release of liquids, Picks up 3-4 times its weight, Mildew resistant, Less linting	Highly absorbent, High tensile strength, Does not lint	Inherent ability to clean without chemicals, Great launderability (200-500 times), Lightweight, Lint-free, holds 7 times its weight in liquid, Releases liquid well	Traditional construction (no need to buy new hardware or handles), Integrated Microfiber picks up more dirt and germs than regular mops, Stronger, longer lasting fibers, Great launderability, Increased absorption and release	Highly absorbent, Little break-in required, Good release of liquids, Picks up 3-4 times weight, Mildew resistant, Less linting
Cons	May shrink when laundered, Higher unit cost	Needs break-in period, Lengthy drying time, Might mildew or degrade	Shrinks when laundered, Little liquid retention	Cut end mops are not launderable	Higher unit cost	Higher unit cost	Shrinks when laundered, Little liquid retention

*Rayon/Cotton/Polyester, Rayon/Polyester **Synthetic fiber integrated with microfiber

General Maintenance and Healthcare Synthetics

Preshrunk

These mopheads are manufactured from yarns created especially for O'Dell. Ideal for use in health care industry, and for other users who launder mops. Prelaundered and preshrunk. In either 4 ply or 6 ply yarns with 5" vinyl mesh headband.

900 Series

4 ply preshrunk. Cotton, rayon, synthetic blend of fibers for maximum durability. Absorbs up to seven times its own weight!

3200 Series

6 ply preshrunk. No break in required with this extremely absorbent rayon synthetic blend. Ideal where the highest standards of cleanliness are essential. Blue, green and white only

4400 Series

4 ply preshrunk, antimicrobial yarn. Locked in antimicrobial protection eliminates germs and bacteria. Rayon/synthetic blend.

5500 Series

4 ply preshrunk, premium quality, synthetic mophead for healthcare applications. Prelaundered with limited break in.

Healthcare Synthetics

Healthcare

Healthcare synthetics contain the same superior quality yarns as our preshrunk mopheads. This ensures both durability and absorbency. 4 ply and 6 ply blended yarn combines the strengths of rayon, acrylic and polyester-tensile strength, absorption and rapid fluid release. The yarn dries quickly which reduces odor and bacterial growth.

3000 Series

6 ply all purpose. A superior quality mophead in 6 ply tight twist rayon/polyester yarns. A truly outstanding mophead. Launderable. Blue, green and white only.

5000 Series

4 ply, premium quality, synthetic blend mophead for healthcare applications. Launderable.

Naturally Antimicrobial

4200 Sterling Plus Series

Green cleaning calls for a critical balance - between new technology and conventional wisdom, between short-term and long-term environmental benefits, and between effectiveness and cost. One concern of scientists with synthetic antibiotics and antimicrobials has been the development of resistant strains of bacteria. Silver and copper ion treatment is a safe alternative to synthetic antimicrobials, because both elements are safe for the environment. The Sterling Plus[®] series is constructed of silver and copper treated rayon/synthetic fibers. Sterling Plus[®] antimicrobial loop mops would be ideal for the commercial laundry rental market, for food service, healthcare, and for all Jan/San applications.

Rayon/synthetic fibers treated with silver-copper antimicrobial agent which will not wash out into the environment. The antimicrobial agent protects the mophead from bacterial & fungal growth, which inhibits yarn degradation and offensive odors. Yarn colors available: Blue, Green, Orange, White.

echo mop

Made of Earthspun® yarn for eco-friendly cleaning

1200 Series

These mops are produced using high quality P.E.T fibers from recycled bottles. Absorbs over 4.4 times its weight in water. Releases almost 30% upon wringing. Over 20% better performance than competitive all-synthetic wet mop yarns. Dries fast. Much longer lasting and lower linting than competitive yarns. Composed of 30% post consumer material and 67% post industrial material. Free from post recycling dyes.

echo mop

1400 Series

Cotton/Rayon/Synthetic blend. These mops combine cotton with P.E.T. fibers from recycled bottles. Cotton gives this yarn blend a high absorption and moisture retention. Absorbs 4.1 times it's weight in water. Releases 22% upon wringing. Premium loop mop performance. Faster drying than similar competitive yarn blends. Less linting and weight loss in laundry. 30% post consumer and 67% post industrial recycled material. Free from post recycling dyes.

Patriot Mop

The Patriot Mop is the only mop in our industry made with recycled combat fatigue uniform clippings and is 100% American made. Combat fatigue uniform patterns are cut and sewn creating clippings (excess material). These clippings are then recycled into fiber, respun into yarn, and finally sewn into a mop. The yarn is super strong, and performance is great, (high launderability and abrasion resistance).

O'Dell donates a portion of the proceeds from the sale of each Patriot mop to military charities.

- › Tailband helps reduce streaking, snagging and loose strings
- › Launderable and reusable
- › Good for heavy cleaning
- › Reduces labor

Restaurant and Clean Room

Knitted and Non-woven

Knitty Gritty for Food Service

This poly cotton blended knit mop was designed to meet the tough, demanding needs of the industrial service industries. This innovative mophead will stand up well to rough, abrasive anti skid floors. The finest quality blended cotton and polyester fibers are twisted and knitted tightly to create a longer lasting, lower linting product with enhanced water holding ability for greater coverage of large floor surface areas. The Knitty Gritty mophead has become widely accepted in food service companies throughout the United States.

Enviro Clean for Clean Room

This nonwoven material is designed to meet the various levels of cleanroom (Class 1000) applications for lint reduction. It is also ideal for food service environments requiring mildew proof cleaning products. Also hospitals controlling infectious disease, oil and hazardous chemical spills.

The unique synthetic web strand construction combines the strength and wearability of twisted polyester and nylon fibers. Liquid and particulate pickup and retention are enhanced by the nonwoven orientation of the fibers. The spiral formed construction provides regions into which fluids will flow by capillary action and surface tension. Linting and shredding are virtually nonexistent. These unique fibers are mildew resistant and fast drying. Available in both cut-end and looped-end.

Industrial, Institutional & Commercial

New Edge Nonwoven Wet Mop

Produced from 100% post industrial material - the new Edge Mop is made from recycled rayon / synthetic nonwoven edge trim. Compared to cotton, this material exhibits 70% greater absorption and 68% greater liquid release, giving the same cleaning results with less yarn fiber. The Edge mop is more economical than cotton, will not unravel, leaves less lint, and requires no break-in time. The Edge mop is ideal for wax stripping, disinfecting, quick spill pick-up, and general purpose cleaning.

- › 70% greater absorption than cotton
- › 68% greater liquid release
- › More economical than cotton
- › Reduced linting
- › Immediate absorption
- › 100% post - industrial nonwoven edge trim
- › Made in the USA

FiberTac® Cut End Wet Mops

O'Dell broadens its line of environmentally friendly wet mopping products with FiberTac® Cut End Wet Mops. Made from 100% recycled fiber content, FiberTac® yarns deliver ultimate green cleaning performance. The exclusive, patented needle punch process actually interlocks the yarn strands, which produces longer lasting, more efficient, faster working mops. These mops virtually eliminate the additional "linting" caused by conventional cotton products, which reduces time, labor and associated cleaning costs.

Lasts up to 3-6 times longer than cotton. Quicker water absorption, faster floor drying and less break in time means more efficient cleaning with less labor costs. With proper care these cut end mop heads can be fully laundered with much less shrinkage than competitive yarns. Attractive blue color also camouflages soiling for longer use.

Liquid Application

Hygrade Rayon

700 Series Hygrade 4 ply rayon yarn with blue stripes to designate mophead is for finish applications. Rayon absorbs moisture well, has good release, and is ideal as a finish mop. Less lint, longer lasting, and faster drying. Excellent for waxing.

PRODUCT NUMBER	SIZE	HEADBAND	CASE PACK	CASE CUBE	WEIGHT LBS
700S	Small	1¼" polyester tape	12	1.09	10
700M	Medium	1¼" polyester tape	12	1.59	13.5
700L	Large	1¼" polyester tape	12	1.85	18
700XL	Extra large	1¼" polyester tape	12	2.37	22.5

Nylon

99 Series This 100% nylon finish mop holds liquid wax suspended by surface tension, not within its fibers. This smooth applicator glides along surfaces and releases finishes rapidly and completely with a lint-free shine.

PRODUCT NUMBER	SIZE	HEADBAND	CASE PACK	CASE CUBE	WEIGHT LBS
991S	Small	1¼" polyester tape	12	1.09	7.5

Liquid Application

EchoShine® finish mops are the most environmentally friendly finish mops available in our industry. These mops are composed of unique yarn blends wholly comprised of recycled fibers and provide all of the desired characteristics of premium finish application mopheads. Whether it be the rayon-P.E.T. blend or the 100% P.E.T. blend you can be assured of a lint free, streak free shine.

Echoshine 1700 Series

66% recycled post consumer P.E.T. from drink bottles, 34% recycled post industrial rayon. Green & white stripe designates EchoShine® finish mop. 6-ply hygrade fiber blend. Smooth, steady release with very low linting. Worker fatigue can be reduced by the smooth flowing application of the EchoShine® mop

PRODUCT NUMBER	SIZE	HEADBAND	CASE PACK	CASE CUBE	WEIGHT LBS

All wet mop handles are available with Bamwood, excluding C-3 & C-4

Cleaning Accessories

Janitor's Cart

This durable, easy-to-clean cart features 8" wheels and 3" non-marking casters. It has built-in tool holders for cleaning tools, a sturdy yellow vinyl trash bag, and two shelves for cleaning supplies. Some assembly required.

PRODUCT NUMBER	DESCRIPTION	CASE PACK	CASE CUBE	WEIGHT LBS
MPC100	Janitor Cart	1	4.405	37

Mop Bucket

This 35 quart Mop Bucket is made of impact resistant high density polypropylene, with 3" non-marking swivel casters and protective bumpers. Yellow color and "caution" sign printed on sides increase visibility. Taller bucket increases capacity and also allows for better water containment, while the smooth molded construction allows for easy clean-up.

Side press and down press wringer

Featuring a corrosion-resistant handle, this wringer can accommodate 12 – 32 oz. mops. Rust-resistant spring provides a long useful life.

Dust Mops

Choosing the right mop for your requirements.

Yarn Types

Cotton: Economical, Accepts dust treatment, Picks up large debris

Synthetic: No dust treatment needed, Dust pick up and retention through static attraction, Long lasting abrasion resistant fibers, Picks up large debris, Good launderability

Hybrid Yarn – Microfiber/Synthetic Yarn: No dust treatment needed, Traditional construction – no need to buy new hardware and handles, Dust pick up and retention through static and tiny microfibers, Long lasting fibers, Great launderability

Backing

Choose backing based on hardware construction – keyhole, slot pocket, universal, or snaps. Durable polyester backing dries quickly. Available colors: blue, green, yellow, orange, and red. Ex: add code BB to item code for blue back

Ends

Cut End: Low initial cost, Good dust pick up

Looped End: Great launderability, reduced tangling, longer life vs. cut end

Available backing styles

Keyhole with ties
Add to Item code: T

Slot Pocket
Add to Item code: SP

Keyhole with snaps
Add to Item code: S

Universal
Add to Item code: U

Clinger Magnetic Cut End

Synthetic yarns with superior pick up ability. The static charge created when using this product attracts and holds fine dust particles. No treatment is required. Standard slot pocket synthetic backing. A real problem solver. In blue, red, green and white*. Launderable.

Integrated Microfiber MicroCling

Micro denier fibers enhance the cleaning power. By giving fibers increased surface area, microfibers add tiny wedge-shaped "hooks" that grab dust from the smallest hiding places. Commercial drying time and laundry shrinkage are significantly reduced, saving energy and material. Snagging and fraying of the microfibers is eliminated by blending with tough, abrasion-resistant yarn. Standard slot pocket construction. Available in blue yarn only.

Patriot Mop

The Patriot Mop is the only mop in our industry made with recycled combat fatigue uniform clippings and is 100% American made. Combat fatigue uniform patterns are cut and sewn creating clippings (excess material). These clippings are then recycled into fiber, respun into yarn, and finally sewn into a mop. The yarn is super strong, and performance is great, (high launderability and abrasion resistance).

O'Dell donates a portion of the proceeds from the sale of each Patriot mop to military charities.

Brooms and Brushes

Corn Brooms

Choosing broom fibers

100% Corn

Broom Corn or broom straw is actually a form of Sorghum, grown specifically for its ability to trap fine dust particles. Microscopic splits on the tassel's outer walls capture dust, making it "the first microfiber". It is water resistant and wears very well, making it the premium broom fiber. Broom corn goes from seed to harvest in about 3 months. It is environmentally friendly because it grows in dry areas, using only rain water. Nothing is wasted --leftover straw and seeds after harvest are used for animal feed.

Corn/fiber

Corn/fiber blended brooms are constructed of broom corn and sotol fibers from the yucca plant. Yucca is a member of the agave or century plant family, which thrives in warm, arid regions. Yucca supplies fibers for rope, mats and basketry. The stiff sotol fibers are used to make the broom's core, which is then wrapped with a layer of broom corn. This makes a strong, economical broom.

Poly fiber

Polypropylene fibers give good sweeping performance indoors or outdoors, especially in damp environments. The tough fibers give a long wear life, do not absorb water, and are resistant to most chemicals, detergents, insects, and mildew.

Eco Brooms®

Environmentally friendly, highly durable, 100% cotton stitching. Recycled plastic, threaded cap fits Bamwood handles. Replace EchoBroom head and retain the durable Bamwood handle

Brushes

Choosing brush fibers

Nylon

Nylon is a flexible, silky synthetic fiber first used in the 1930s to make toothbrush bristles and women's hosiery. Nylon has a high heat tolerance – it melts instead of burns. It stands up to most acids, alkalis, oil, detergents, and solvents, and is extremely abrasion resistant. Strong enough to be used for seatbelts, nylon resists rot, bugs and mildew. Unlike most polymers, it will absorb water, but does not mat or hold odors. For this reason, it is used in food service.

Palmyra

Palmyra fibers come from the leaf stalks of the Palmyra palm, native to India, Southeast Asia, and Africa. Also called a Sugar palm, Palmyra resembles a tall coconut tree. The leaves are used to make thatching, baskets, and fans, as well as brush bristles. Durable Palmyra is brown in color, has a stiff- to medium-stiff texture, and is resistant to liquids. Economical and tough, Palmyra is ideal as an all-purpose heavy duty sweep for sidewalks, patios, driveways, and general landscape maintenance.

Palmyra Stalks

Also a product of the Palmyra palm, Palmyra stalks are very coarse, stiff, and strong. It has the appearance of split bamboo or cinnamon bark. Used in its native habitat for fencing, Palmyra stalks are commonly made into street brooms, and used for clearing the heaviest debris. Excellent for wet and dry use; over pavement, concrete and driveways.

Polypropylene

Polypropylene is a synthetic fiber that is available in many colors and weights for different applications. Poly fibers have a long useful life and are acid and solvent resistant. They are waterproof and rot resistant, and dry quickly. Crimped poly fibers have more water retention ability, and flagged poly fibers have a soft bristle tip that can gather fine particles of debris. Perfect for industrial and commercial settings where sweeping is constant, polypropylene can be used for scrubbing wet and dry surfaces.

Polystyrene

A durable synthetic fiber that resists moisture and most solvents, polystyrene is almost as strong as aluminum, but much more flexible. Flagged polystyrene fibers deliver dependable, non-scratch performance to painted vehicle surfaces and windows. Excellent for service stations, food service and other commercial applications.

Tampico

Derived from the leaf of the Lechugilla plant of Mexico, tampico has a soft to medium texture. It has a natural white color, but is frequently dyed or bleached. Tampico has good resistance to heat and chemicals, good water retention, and can maintain its stiffness while wet. It has excellent shape memory, and can be used alone or blended with other fibers.

Floor Sweeps

Palmyra

Good for indoor or outdoor sweeping on concrete or any other hard surface. Stiff brown natural fiber. Lacquered, quality hardwood blocks. Hardwood block with 3 1/4" trim

Black Polypropylene Fiber

Medium floor sweep. Ideal for commercial and industrial floors. Tough enough for outdoor sweeping. Hardwood block in 3" trim. Highly recommended for multiple uses.

Black Tampico

Medium/fine floor sweep. Soft, black natural fibers for smooth or rough floors. Hardwood blocks in 2 3/4" trim.

Maroon Polypropylene Fiber

Heavy floor sweep. A man-made coarse fiber. Great for heavy duty use in a commercial or industrial setting, like gas stations, garages, or car wash. Impervious to water. Hardwood block in 3" trim.

Grey Polypropylene Fiber

Soft flagged grey plastic fiber is ideal for sweeping fine dust and dirt on smooth surfaces. Hardwood block with 3" trim.

What is Microfiber?

Microfiber is very fine synthetic fiber composed of 80% polyester 20% polyamide (nylon) 100x finer than human hair. The fibers are split to create microscopic hooks and increase absorbency.

Split microfibers allow for more aggressive cleaning and removal of microscopic debris than conventional methods.

Many facilities can operate in a cleaner environment by using microfiber cleaning products. Schools, healthcare facilities, and offices are all appropriate settings for the use of microfiber wet and dry pads.

With rising concern over Indoor Air Quality, microfiber cleaning systems continue to be developed that keep cleaning for health as their foremost goal.

MICROFIBER
lifts and locks dirt and moisture deep within fibers

ORDINARY FIBERS
push and scatter dirt and moisture

How does microfiber work?

The dense construction of split microfibers creates a more efficient cleaning system through:

- › Positively charged microfibers attract negatively charged dust.
- › Excellent absorbing power pulls liquid away from surfaces
- › Surface tension is broken, allowing the option of cleaning with water or with fewer chemicals.

new Color Flag™ Coding System

Color-coding of cleaning equipment helps keep your building, employees and occupants safe and healthy by reducing the risk of using contaminated cleaning tools from one department in another.

Color-coded tools simplify the daily tasks for cleaning employees, and reduce the chance for mistakes in cleaning chemical mixing.

The Color Flag™ Coding System from O'Dell is a safe, effective, and economical way to color-code your microfiber cleaning equipment.

Avoid cross contamination and keep supply management costs in check by using Color Flag products. With Color Flag products, you have one inventory with four color options.

O'Dell microfiber wet pads feature four Color Flags to make color-coding convenient. Simply remove the unwanted flags when bringing a pad into service, and your pad is color-coded for its department. Frames and handles come with snap-on plastic Color Flag rings.

Use the Color Flag rings to designate red, blue, yellow or green. All new Color Flag buckets come with water and chemical resistant vinyl labels that are easy to apply. Manage your cleaning procedures and cleaning supplies with Color Flags!

- › **Avoid cross contamination**
- › **Reduce inventory**
- › **Simplify color coding**

Each pad carries four color flags - simply remove the extra flags

Color Flag™ tools come with a complete color flag set.

Color flag for buckets

Color flag for frames

Color flag for handles

Healthcare

Advantage Bucketless Mopping System *The Ultimate Healthcare Cleaning System*

The powerful combination of O'Dell Microfiber Pads and the direct dispensing design of The Advantage saves time, chemical and water use, and labor cost. The direct application of uncontaminated cleaning solution reduces chemical use and virtually eliminates cross contamination and wastewater.

O'Dell's Advantage+ is compatible with the following O'Dell products:

SLM185PKT

SLM185

PMFPKT

MFM185B-CF

PRODUCT NUMBER	DESCRIPTION	CASE PACK	CASE CUBE	WEIGHT LBS
BWMS-16	Advantage Plus Bucketless wet mop system	1	0.65	4
REPLACEMENT PARTS				
BWMS-VK	Valve kit	1	0.25	1
BWMS-T	Tether without cap	1	0.125	1
BWMS-TC	Tether and top bottle cap	1	0.25	1
BWMS-CV	Bottom bottle cap valve	1	0.25	1
BWMS-BTC	Bottle with tether and caps	1	0.34	1

Outperforms the competition at every level with more innovative features.

Ergonomic 360 degree rotating handle cap reduces user fatigue and provides smooth figure eight application.

Large, easy-to-fill, tethered cap features an integrated hanger to store multiple bottles on maid's cart.

32 Ounce capacity bottle includes fill level graduations in ml and ounces.

Secure ball-valve guarantees a positive on and positive off flow control unlike competitors with unreliable pinch valves.

Ball point trigger Works like a pen. Click-on/click-off reduces hand fatigue. No need to continually squeeze the trigger.

Sliding handle hook makes storage simple.

Top and bottom caps and removable bottle make cleaning easy.

Chemical Identifier labels are bilingual and provided with every unit.

Viton seals ensure confident operation with a variety of heavy duty chemicals.

Handle end constructed to accept pinch style, hook-and-loop, yoke style, and collapsing frame configurations to compliment any O'Dell program the distributor is stocking.

Heavy duty frame and 360° swivel

Microfiber for Wet Floor Applications

EchoLine® Microfiber Wet Pads

- › Color Flag Coding - HACCP compliance with one pad, not four
- › O'Dell Echoline microfiber wet pads have the highest fabric weight in our industry
- › 100% Split microfiber captures particles
- › Lasts hundreds of launderings
- › Fits standard 18" & 24" hook and loop frames
- › MFM185B-CF uses frame (AMFMF-16) and handle (TH-BF60) and MFM245B-CF uses frame (AMFMF-22) and handle (TH-BF60)
- › Heavy duty hook and loop back
- › Inner microfiber layer gives greater saturation to insure proper dwell time.

Power Scrub Microfiber Pad

When a floor requires more persuasive cleaning, use the Power Scrub microfiber pad with scrubbing fibers to help remove stains on most hard surfaces. Good for cleaning stone and ceramic tile, and power-lifting stains from grout lines. Use in heavy traffic areas like lobbies, restrooms and foodservice areas, to lift stubborn grime from recessed areas in your tile floors.

- › Scrubbing fibers integrated into pad (no rows)
- › Unique 'smooth-glide' design provides less drag across floor surfaces
- › Uses frame (AMFMF-16) and handle (TH-BF60)

MFSP185	5 x 18"	12	0.42	1.9

EchoFiber Microfiber Loop Mop

EchoFiber® Loops Mops combine the cleaning power of split microfiber with convenience – they fit traditional handles, bucket, and wringers! Advanced microfiber synthetic loops are bound by a tail-band. EchoFiber mops will not tangle, leave strings, or snag. These mops are lightweight, easy to use, easy to wring, and fast drying. They last hundreds of launderings.

- › Superior strength
- › Immediate absorption
- › Micro-level cleaning
- › Launderers 100s of cycles
- › Lint free
- › Easy glide performance

Spun Loop Pads for Wet Floor Applications

Why use Microfiber Spun Loop pads?

- › High loop pile gives higher absorption than woven pads
- › Cleans uneven surfaces
- › Loops capture large particles
- › Loop pile gives greater saturation to insure proper dwell times for cleaning chemicals
- › Durable up to 500 washes (200 washes with diluted chlorine bleach)
- › Clean more floor space with one pad

Spun Loop Wet Pad Hook & Loop

- › Color flag coding - HACCP compliance with one pad - not four
- › Fits hook-and-loop frame (AMFMF-16) and handle (TH-BF60)

PRODUCT NUMBER	DESCRIPTION	CASE PACK	CASE CUBE	WEIGHT LBS

Echoline® Microfiber Handle & Frames

Our microfiber hardware is made of lightweight yet durable aluminum. Lockable telescopic handle TH-BF60 extends from 34 – 60 inches. Simply slide frame connector into the telescopic handle and it locks into place with an easy-to-open push button. Frames have hook and loop strips which can be used with wet or dry microfiber pads. Frame swivels to provide full 360° range of motion, or can be locked in place. 16 and 22 inch sizes are available in the new and improved smooth surface aluminum frame, which prevents moisture, debris, and dirt collection in the frame. In addition, the velcro strips are channel fit, and therefore replaceable. 36 inch frame has grooves to increase its rigidity for smoother cleaning.

PRODUCT NUMBER	DESCRIPTION	CASE PACK	CASE CUBE	WEIGHT LBS

Housekeeping Cart for Microfiber Applications

Housekeeping Cart

O'Dell's Modular Plastic Housekeeping Cart is designed for microfiber flat mopping systems as well as traditional mop and bucket. It is easy to assemble, taking only 20 minutes. The entire cart is constructed of Copolymer Polypropylene, which is rust-proof and recyclable. The cabinet has a storage capacity of 4.4 cubic feet. Trash doors are an optional feature of this cart.

PRODUCT NUMBER	DESCRIPTION	CASE PACK	CASE CUBE	WEIGHT LBS
AMC100	Housekeeping Cart	1	9.92	51
AMCTD	Trash Doors	2	5.02	10

Features	Benefits
Trash lid with cleaning instruction pocket	JCAHO compliant lid covers trash and provides a safe place to store cleaning instructions
Adjustable trash bag bar	The sliding bar allows for the use of two bags for separate waste collection
Front platform holds a flat mop charging bucket, or traditional mop buckets	Changing microfiber flat mop pads can reduce or eliminate chance of cross contamination
Five 4" swivel casters	Non-marking wheels allow for 360° range of motion and excellent control
Adjustable shelf	User can adjust for height of products and stocking items in the cart
Two self latching and locking doors	JCAHO compliant for maximum safety and security
Seven handle holders	Secures mop handles, brooms and dusters
Top reservoir	Holds cleaning supplies or small buckets
Optional trash doors	Conceals trash from sight and has a hook inside to hold safety signs

Dry Floor Applications

Microfiber Dry Dust Pads with Fringe

- › Microfiber dry dusting pads have a positive electrostatic charge that traps fine particles and keeps them until laundered.
- › Fringe traps large particles like a standard dust mop.
- › Lasts hundreds of launderings.
- › Available in 18, 24, 36, 48, and 60 inch sizes.
- › Fringed microfiber pads cover more surface area than plain dust pads.
- › Fits standard dust mop wire frames and clip-on handles (ex: MFD185G-FSP uses frame # F185 and handle # H600)

PRODUCT NUMBER	DESCRIPTION	CASE PACK	CASE CUBE	WEIGHT LBS
MFD185G-FSP	5 x 18"	6	0.29	2.55

BioFiber®

BioFiber® is the perfect disposable dry dusting sheet for your green cleaning program.

BioFiber is disposable and economical, outperforming the leading sweeper brand while giving the added benefit of being biodegradable. BioFiber builds an electrostatic charge that draws and locks in dust particles, which improves indoor air quality in hospitals, office buildings, classrooms and stores. The specially formulated long fiber technology attracts 99% of bacteria without use of any chemicals, helping to protect against cross-contamination in healthcare environments.

Once used, BioFiber sheets can be safely disposed into landfills or composted. Within 4-6 weeks they will break down into less than 1 oz. of inert material. BioFiber has been tested and proven for biodegradability in accordance with the ASTM D6400-99 standard.

Microfiber Cleaning and Dusting

Microfiber Dusting Tools

MicroFeather™ dusting tools feature very fine split microfiber. Soft feathers of microfiber trap and store minute dust particles and will not scratch delicate surfaces.

- › MicroFeather duster (MFD23) outperforms ostrich, lambswool, and polywool dusters. Flexible head fits any dusting job. Threaded to accept extension handle (TH-BM60).
- › 18" MicroFeather Flexible Duster (MFD18) performs like our MicroFeather duster, with a solid handle. Assorted colors.
- › 11" MicroFeather Mini Duster (MFD11) Convenient size for home and office use. Assorted colors.

To hand wash microfiber dusters: Wash head with warm soapy water, rinse, towel dry, then spin between hands to fluff. Hang to dry.

PRODUCT NUMBER	DESCRIPTION	CASE PACK	CASE CUBE	WEIGHT LBS
MFD11	11" Mini Duster	12	0.11	1.5
MFD18	18" Flexible Duster	12	0.26	3.7

Grip-N-Flip patent pending

The new Grip-N-Flip Microfiber Mitt combines microfiber performance with convenience. 10 Layers of microfiber makes Grip-N-Flip easier to use than any cleaning cloth or mitt in the industry.

Ordinary microfiber mitts have two cleaning surfaces. Cloths have more surface area, but can contaminate the clean area due to unfolding and bunching.

Grip-N-Flip Mitts combine the surface area of a cloth with the easy utility of a mitt!

- › Clean more places with 10 clean faces
- › 10 sides trap dirt
- › Color coding helps control cross contamination
- › Cleans without chemicals, wet or dry
- › Safe for all surfaces
- › Wash & Reuse

MicroWash

Microfiber Cleaner Concentrate

MicroWash is a non-toxic, non-detergent and fully biodegradable microfiber cleaner. It is concentrated to remove heavy soil, grease, wax and oil from microfiber. MicroWash works by trapping and dissolving soils, allowing them to be rinsed away with water. It is also effective in hard water.

- › Non-toxic
- › Biodegradable, organic formula
- › Non-detergent formula restores microfiber
- › Contains no bleach or fabric softener
- › Leaves no residue
- › Does not stiffen microfiber
- › Does not promote bacterial growth.

Applications: Hospitals, Nursing homes, Hospitality, Food Service, Industrial, Automotive, Health Clubs & Spas, Commercial Cleaning

Squeegees

Straight Rubber

These black rubber squeegees are for medium duty. They feature non-marking 2" blades, galvanized metal frames and lock strips, and accept tapered handles. 36" curved rubber squeegee corrals and removes liquids with ease.

PRODUCT NUMBER	DESCRIPTION	SIZE	CASE PACK	CASE CUBE	WEIGHT LBS
SQF-24	Straight rubber squeegee	24"	6	1	16

SQF-24

Floor Squeegee

Color choices meet the USDA's hazard analysis critical control points (HACCP) to prevent cross contamination. 18-24", non-marking blades are ideal for removal of liquids and light soil on uneven surfaces. Leaves floor dry to the touch. Made of sturdy, non corrosive plastic. Frame accepts standard threaded handle.

Pad Driver

The 3/4" offset trim on our pad drivers holds carpet bonnets and scrubbing pads securely in place under both wet and dry conditions. The high impact block withstands the bumps and bruises associated with everyday use. Available in 13" thru 20" inch diameters each driver comes with riser and universal clutch plate attachment.

PRODUCT NUMBER	DESCRIPTION	SIZE DIA	CASE PACK	CASE CUBE	WEIGHT LBS

PPP19	Trim Pad Driver	19 x 1/2"	1	0.81	8
PPP20	Trim Pad Driver	20 x 1/2"	1	0.81	9

Options

O'Dell offers many different options for the products that we manufacture. A very simple system of item number suffixes is used in designating the option that you may desire. Below you will find a listing of options available from O'Dell for your convenience.

WB (wide band) example: 5320FWB

Available on all wet mops that do not come standard with this option. We use 5" vinyl coated nylon mesh on all wide band mops. (15¢ ea. up charge for wide band where not standard)

SP (scrub pad) example: 5000M/White SP

Available on all mops manufactured by O'Dell. We use a 5" x 5" black scrub pad for aggressive removal of marks and debris. (30¢ ea. upcharge for scrub pad mops)

7", 8" & 9" head band example: 4200L/Green9

Available on all wet mops that do not come standard with this option. We use vinyl coated nylon mesh or woven polyester cloth on expanded band width mops. Add desired width to end of part number. (25¢ ea. for 7", 35¢ ea. for 8", and 45¢ ea. for 9")

TB (tail band) example: 5516FTB

Available on most mopheads manufactured by O'Dell that do not come standard with this option. Tailbands provide even spread for streak-free enhanced area coverage with each swipe of the mop. As a standard all tailbanded mops have looped-ends as an added benefit. (80¢ ea. upcharge for tailbanded mops where not standard)

NB (narrow band) NBM (mesh narrow band) example: 400M/Blue NB

Available on all wet mops that do not come standard with this option. We use 11/4" starched polyester canvas tape as well as vinyl coated nylon mesh on narrow band mopheads. (15¢ ea. deduction for narrow band where not standard)

2TB (double tailband) example: 2000XL/Blue-2TB

Available on all loop mops from O'Dell. The second tailband ensures a tangle free product as well as adding longevity to the mophead. As with a single tailbanded mop the ends are looped as an added value. (.40ea upcharge to add second tailband)

IF (industrial flat) example: 2320FIF

Available on all wet mops manufactured by O'Dell. We use a plastic injection molded cap which incorporates a metal threaded stud that accepts standard industrial flat handles (C-10, C-11, C-25). (50¢ ea. up charge on all industrial flats).

CE (cut-end) example: 900M/OrangeCE

Available on all mopheads from O'Dell that do not come standard with this option. The ends may be cut on standard loop mops however, the tailband will remain in place. (no price changes)

TO (twist-on) example: 8000L/GreenTO

Available on all wet mops from O'Dell that do not come standard with this option. The plastic injection molded cap is threaded to accept any handle with standard acme threads. (40¢ ea. upcharge for twist-ons where not standard)

Tools from O'Dell may be purchased on an individual basis or as a kit. Kits can be custom packed to meet your specific needs. This may also include mopheads, push brooms, upright brooms, handles, as well as any other item available from O'Dell.
