KNOW-HOW

PACIFIC[®]
F L O O R C A R E

IF IT'S PACIFIC, IT'S DONE RIGHT.

At Pacific we listen to our customers. We strive to design and develop a breadth of cutting edge technology, to make your jobs easier. You can count on our products to be engineered with simple innovation. This means they are built to perform and built to last. We have patented, industry first technology incorporated into our machines that protect them from damage, keep them running quietly, and leave your space cleaner and safer than any other machine in the marketplace.

WHEN IN BUSINESS FOR OVER 66 YEARS, THERE IS A LOT OF HISTORY THAT SHAPES A COMPANY - HERE ARE A FEW INTERESTING FACTS ABOUT PACIFIC FLOORCARE®

- The company has always resided on the "West Coast"
 - Founded in San Francisco on the Pacific ocean coastline and moved to Michigan's West Coast on the shores of Lake Michigan
- Hines Corporation
 - Pacific Floorcare is just one of the seven successful companies owned by Hines Corporation
- Pacific Floorcare was the first to introduce a dual-voltage AC/DC backpack vacuum, beltless manual sweepers, a spot and spill extractor with built-in dry, and "sweep and scrub" auto scrubbers
- Safety, Savings, & Simplicity
 - With our customers in mind, we design our equipment to increase efficiency and productivity, and provide a clean and safe environment, while incorporating easy to use technology
- Pacific Floorcare sets the bar for innovative floor care technology
 - Healthcare
 - Education
 - Retail / Grocery
 - Food processing
 - Transportation

PACIFIC®
FLOORCARE

KNOW YOUR TARGET. KNOW WHERE TO AIM.

THE BRAND IS **PURPOSE BUILT.**[®]

Pacific Floorcare knows cleaning professionals value tools they can depend on to always achieve the goals they are tasked with. Strength and durability are requirements, not bonuses. From floor scrubbers to vacuums, they must work right every time and minimize hassle.

Pacific Floorcare builds purpose into its products, with each incorporating unique attributes in its design that are delivered at an affordable, high value price point. It supplies a line of floor care equipment products that meet the needs of our customers. And, as the company develops new products, you can be assured that they will be tried and tested by cleaning professionals long before they hit the market. Pacific Floorcare's focus on cleaning professionals delivers a much deeper level of knowledge and insight for their new equipment designs.

Pacific Floorcare designs its machines in the United States of America for North America markets. Its products certainly might meet the needs of markets across the globe, but in order to remain focused, the company's research is concentrated here, and the products remain undiluted by unique needs from outside the region that can drive undue costs.

Pacific Floorcare strives to upgrade and improve its machines to make its customers' jobs easier. Simplicity, durability, and safety are key factors in Pacific's research and design process. Pacific Floorcare's product development decisions are made with you in mind.

Pacific Floorcare is in business so you can achieve your purpose, and therefore it makes Purpose Built Machines. It is in the business of making products that work well and work all the time, because its customers need to work well all the time. As a privately owned U.S. based company, Pacific Floorcare is uniquely positioned to partner with cleaning professionals that require the highest value cleaning tools.
